

## ENVIROMENTAL & QUALITY COMPLIANCE SPECIALIST

 **Adres:** Zdrój 49a, 62-065 Grodzisk Wlkp.  **Obszar:** Quality  **Wymiar czasu pracy:** Pełny eteat

### ABOUT THE ROLE

We are looking for an experienced Environmental & Quality Compliance Specialist who will take responsibility for environmental management, regulatory compliance, and selected quality-related processes within our organization. This role combines environmental expertise with a structured quality approach. The person in this position will ensure that our operations comply with environmental regulations, manage waste and emissions reporting, and support the organization in building sustainable and compliant processes. You will work closely with Production, Engineering, Quality, and external authorities to ensure that environmental and quality standards are implemented, monitored, and continuously improved. The role requires strong analytical skills, a good understanding of environmental regulations, and the ability to translate legal requirements into practical operational processes.

### KEY RESPONSIBILITIES

- Ensuring compliance with environmental regulations and applicable legal requirements.
- Managing and maintaining environmental documentation and reporting systems (including BDO).
- Monitoring and reporting emissions of gases and dust, ensuring compliance with environmental permits and limits.
- Overseeing waste management processes, including waste classification, reporting, and cooperation with external waste contractors.
- Preparing and maintaining environmental reports and documentation for internal and external stakeholders.
- Supporting audits and inspections conducted by environmental authorities.
- Identifying environmental risks and improvement opportunities within production and operational processes.
- Supporting the development and implementation of internal environmental procedures and standards.
- Cooperating with Quality, Production, and Engineering teams to ensure compliance and process efficiency.
- Supporting continuous improvement initiatives related to sustainability, environmental impact reduction, and operational excellence.

### QALIFICATIONS

- Bachelor's degree in Environmental Engineering, Environmental Protection, Industrial Engineering, Quality Management, or a related field.
- Practical knowledge of environmental regulations and reporting systems, including BDO.
- Experience in waste management and environmental compliance in an industrial environment.
- Knowledge of sustainability reporting or ESG topics.
- Experience in cooperation with regulatory authorities and preparation of environmental documentation.
- Strong analytical and problem-solving skills.
- Ability to work independently and manage compliance-related processes.
- Good organizational skills and attention to detail.
- Very good command of English (B2), both written and spoken.
- Experience in quality management systems (e.g., ISO 9001 / ISO 14001) will be an advantage.

### WE OFFER

- Becoming a member of a motivated and enthusiastic team and shape and develop the future of our growing organization
- Dynamic and collaborative work environment.
- Competitive salary and benefits packages.
- Work in an international environment within a long-term oriented family-owned business
- Opportunity to develop within the organization
