

## QUALITY & ADHESIVE BONDING SPECIALIST

 **Adres:** Zdrój 49a, 62-065 Grodzisk Wlkp.  **Obszar:** Quality  **Wymiar czasu pracy:** Pełny eteat

### ABOUT THE ROLE

We are looking for a Quality & Adhesive Bonding Specialist who will combine responsibility for quality processes with expertise in adhesive bonding technology. In this role, you will act as both a quality expert and a bonding specialist, ensuring that products and processes meet customer, regulatory, and internal requirements. You will be responsible for maintaining compliance with EN 17460 standard, while also supporting quality assurance, problem-solving, and continuous improvement activities. This is a key position within the organization, requiring a hands-on approach, technical knowledge, and the ability to work across multiple departments including Production, Engineering, and Project Management.

### KEY RESPONSIBILITIES

- Ensuring compliance with EN 17460 requirements for adhesive bonding processes.
- Acting as internal expert for adhesive bonding technology (process, materials, surface preparation).
- Supervision and support of bonding processes in production.
- Responsibility for selected quality processes and documentation.
- Participation in FAI, inspections, and quality approvals.
- Identification of non-conformities and leading root cause analysis (8D).
- Implementation and follow-up of corrective and preventive actions.
- Supporting audits (internal, customer, certification) including bonding-related requirements.
- Cooperation with Engineering and Production in process development and optimization.
- Training and supporting production staff in bonding and quality standards.
- Monitoring process performance and identifying improvement opportunities.
- Supporting continuous improvement and Lean initiatives.

### QUALIFICATIONS

- Technical education (Engineering, Materials Science, Mechanical Engineering or similar).
- Certification according to EN 17460 (e.g. Adhesive Bonding Specialist / Adhesive Bonding Technician / Adhesive Engineer).
- Experience in quality roles within manufacturing environment.
- Practical knowledge of adhesive bonding processes.
- Experience in problem solving (8D, root cause analysis).
- Understanding quality standards and documentation.
- Ability to combine operational (production) and analytical (quality) work.
- Strong communication and teamwork skills.
- Good command of English (min. B1/B2).

### Nice to have

- Experience in railway, automotive, or aerospace industry.
- Knowledge of FMEA, Control Plan, PPAP / FAI.
- Experience with audits and certification processes.
- Familiarity with Lean Manufacturing / Continuous Improvement.

### WE OFFER

- Becoming a member of a motivated and enthusiastic team and shape and develop the future of our growing organization
- Dynamic and collaborative work environment.
- Competitive salary and benefits packages.
- Work in an international environment within a long-term oriented family-owned business
- Opportunity to develop within the organization
